

FINANCE AND TREASURY TRAINING

Global Capital Markets

5 day course

Classroom, online or in-house

Course overview

A working map of how capital moves internationally and what determines its price. Delegates cover the money, bond, equity and derivative markets, the participants in each and what they are actually trying to do, the issuance process from mandate to settlement, and the market infrastructure that clears and settles the result. Pricing and yield analysis are worked through rather than described. The course pays specific attention to how African issuers and investors access these markets, including sovereign and corporate eurobond issuance, the effect of a credit rating on cost of funds, and the currency exposure that comes with raising money offshore.

What you will learn

- Describe the money, bond, equity and derivative markets and their participants
- Follow an issuance from mandate through pricing to settlement
- Price fixed income instruments and analyse yield
- Explain the role of clearing, settlement and market infrastructure
- Assess how a credit rating affects an issuer's cost of funds
- Evaluate access routes and currency exposure for African issuers

Who should attend

- Treasury and capital markets professionals
- Investment analysts and asset managers
- Corporate finance staff
- Regulators and central bank staff
- Finance professionals moving into markets roles

Course outline

- 01 The structure of international capital markets
- 02 Money markets and short term funding
- 03 Bond markets, pricing and yield analysis
- 04 Equity markets and listing
- 05 Derivatives and their role in the markets
- 06 Issuance from mandate to settlement
- 07 Clearing, settlement and market infrastructure
- 08 African issuers, ratings, access and currency exposure
